DrinkPAK, LLC

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of DrinkPAK, LLC, which comprise the balance sheet as of December 31, 2021, and the related statements of operations, members' equity, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of DrinkPAK, LLC as of December 31, 2021, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of DrinkPAK, LLC and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As discussed in Note 8, the Company has restated the financial statements to correct a misstatement. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about DrinkPAK, LLC's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of DrinkPAK, LLC's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about DrinkPAK, LLC's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Moss Adams LLP

Los Angeles, California
June 15, 2022, except as to Note 8, which
is as of August 16, 2022

Note 1 – Nature of Business

DrinkPAK, LLC (the "Company") was formed as a Delaware limited liability company on September 8, 2020 ("inception"). The Company is a contract manufacturer of premium alcoholic and non-alcoholic beverages that provides comprehensive operational services including procurement support, complex batching and processing, filling, packaging, and on-site storage and distribution.

Note 2 – Summary of Significant Accounting Policies

Basis of presentation – The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Use of estimates – The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Estimates are based on historical experience and other assumptions that management believes to be reasonable, the results of which form the basis of making judgments about the carrying values of assets and liabilities. Actual results could differ from those estimates.

Cash and cash equivalents – The Company considers all highly liquid investments, with a maturity of three months or less when purchased, to be cash equivalents. Cash equivalents are generally overnight money market investments. The Company maintains its cash in bank deposit accounts, which at times may exceed federally insured limits. The Company has not experienced any losses in such accounts. The Company mitigates its risk by placing funds with high credit quality financial institutions, and, consequently, the Company believes it is not exposed to any significant risk on its cash balances.

Accounts receivable – The Company provides credit to its customers and records accounts receivable at net realizable value. There is no allowance for doubtful accounts at December 31, 2021.

Inventory – Inventory is stated at the lower of cost or net realizable value. The Company provides allowances to adjust the carrying value of its inventory to account for potential obsolescence. All inventory on hand at December 31, 2021, consists of raw materials to be used in production of customer orders.

Prepaid expenses and other current assets – Prepaid expenses and other current assets primarily include prepayments made for insurance, selling, marketing, operational, and general administrative expenses.

Property and equipment – Property and equipment are stated at cost less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally five to twelve years. Leasehold improvements are amortized using the straight-line method over the shorter of the terms of the leases or their estimated useful lives. Expenditures for repairs and maintenance are charged to expense as incurred.

Note 2 – Summary of Significant Accounting Policies (continued)

Valuation of property and equipment – In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 360, *Property, Plant and Equipment*, the Company reviews its property and equipment for impairment when events or changes in circumstances indicate the carrying amount of such assets may not be recoverable and exceeds its fair value. There were no impairments recorded to property and equipment for years ended December 31, 2021.

Revenue recognition – In May 2014, the FASB issued Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*. ASU No. 2014-09 is a comprehensive new revenue recognition model that requires revenue to be recognized in a manner to depict the transfer of goods or services to a customer at an amount that reflects the consideration expected to be received in exchange for those goods or services. The Company adopted ASC 606 since their inception on September 8, 2020.

The Company determines revenue recognition through the following steps:

- Identification of the contract, or contracts, with a customer
- Identification of the performance obligations in the contract
- Determination of the transaction price
- Allocation of the transaction price to the performance obligations in the contract
- Recognition of revenue when, or as, the Company satisfies a performance obligation

As part of its assessment of each contract, the Company evaluates certain factors including the customer's ability to pay or credit risk. For each contract, the Company considers the promise to transfer products, each of which is distinct, to be the identified performance obligations.

The nature of the Company's business gives rise to variable considerations, including discounts, returns, and allowances that generally decrease the transaction price, which reduces revenues. Variable consideration is estimated at the most likely amount that is expected to be paid. Estimated amounts are included in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved. Estimates of variable consideration are based on historical experience and known claims.

As the Company's standard payment terms are less than one year, the Company has elected, as a practical expedient, to not assess whether a contract has a significant financing component. The Company allocates the transaction price to each distinct product based on its relative standalone selling price. The product price as specified on the purchase order is considered the standalone selling price as it is an observable source that depicts the price as if sold to a similar customer in similar circumstances.

Incidental items that are immaterial in the context of the contract are recognized as expense. The Company does not have any significant financing component as payments are received before, at, or shortly after the point of sale. Costs incurred to obtain a contract will be expensed as incurred when the amortization period is less than a year.

Note 2 – Summary of Significant Accounting Policies (continued)

The Company recognizes an asset for the incremental costs of obtaining a contract with a customer if it expects the benefit of those costs to be longer than one year. The Company has concluded that none of the costs it has incurred to obtain and fulfill its sales contracts meet the capitalization criteria, and as such, there are no costs deferred and recognized as assets on the balance sheet at December 31, 2021.

Certain of the Company's sales are commissionable. The Company pays sale commissions when the cash for the related sales is received. Commissions included in selling and marketing expenses in the accompanying statement of operations for the year ended December 31, 2021, amounted to $6,902. The Company did not capitalize any commissions during the year ended December 31, 2021.

The Company's contracts with customers are for products sales and monthly operational services such as storage and warehousing. The Company's product sales are performance obligations that are satisfied when control transfers to the customer at a point in time, when the order is prepared for customer pick up. The Company does not deliver products to customers. Accordingly, no shipping expenses were incurred during the year ended December 31, 2021. Revenue for monthly operational services is recognized at the end of each month, rather than ratably over the month.

Advertising costs – Advertising costs are expensed in the period in which they are incurred. Total advertising costs included in selling and marketing expenses in the accompanying statement of operations for the year ended December 31, 2021, amounted to $131,220.

Research and development – Research and development costs are expensed as incurred. Substantially all research and development expenses are related to new product development and design improvements or increased functionality in current products or manufacturing processes.

Concentrations of credit risk – Financial instruments that potentially subject the Company to significant concentrations of credit risk consist primarily of cash and cash equivalents and accounts receivable. The Company maintains its operating cash balance with a major financial institution. At times, cash balances may be in excess of Federal Deposit Insurance Corporation insurance limits. This is mitigated by the use of a high credit quality banking institution. Accounts receivable are unsecured and the Company is at risk to the extent such amounts become uncollectible. Concentration of credit risk with respect to accounts receivable is generally mitigated by the Company performing an ongoing credit evaluation of its customer.

Customer concentration – Sales to two customers amounted to 80% of net sales for the year ended December 31, 2021. Amounts due from these customers included in accounts receivable on the accompanying balance sheet amounted to $2,255,518 at December 31, 2021.

Income taxes – The Company is a limited liability company which provides for profits and losses to be reported at the individual member level for income tax purposes. FASB ASC 740-10, Income Taxes, prescribes a recognition threshold and measurement process for accounting for uncertain tax positions and also provides guidance on various related matters such as de-recognition, interest, penalties, and disclosures required. The Company files income tax returns in the U.S. federal jurisdiction and various state jurisdictions. Management does not believe the Company has any entity level uncertain tax positions.

Note 2 – Summary of Significant Accounting Policies (continued)

Equity-based compensation – Equity-based compensation cost is measured at the grant date based on the estimated fair value of the award and is recognized as expense over the employee's requisite service period. Certain awards vest based upon the achievement of pre-established performance criteria, including hurdle amounts prior to distribution, upon a sale of the Company, or another liquidity event as defined in the award agreement. The Company estimates the fair value of performance-based awards at the date of grant based upon the probability that the specified performance criteria will be met.

Fair value of assets and liabilities – FASB ASC 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Observable inputs other than Level 1 prices such as quoted prices for similar assets and liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

As of December 31, 2021, the Company's financial instruments, including cash, accounts receivable, inventories, prepaid and other current assets, accounts payable, and accrued expenses are carried at cost, which approximate fair value, due to the relatively short maturities of these instruments.

Contingencies – The Company is subject to a range of claims, lawsuits, and administrative proceedings that arise in the ordinary course of business. The Company accrues a liability (which amount includes litigation costs expected to be incurred) and charges operations for such matters when it is probable that a liability has been incurred and the amount can be reasonably estimated. Estimating liabilities and costs associated with these matters requires significant judgment based upon the professional knowledge and experience of management and its legal counsel.

Leases – In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842).* The pronouncement requires the recognition of a liability for lease obligations and a corresponding right-of-use (ROU) asset on the balance sheet and disclosure of key information about leasing arrangements. Additionally, the new lease guidance requires a dual approach for lessee accounting, under which a lessee would account for leases as either finance leases or operating leases. For finance leases, the lessee would recognize interest expense and amortization of the right-of-use asset, while for operating leases, the lessee would recognize a straight-line total lease expense. The guidance also requires qualitative disclosures related to the amount, timing, and uncertainty of the cash flows arising from the leases.

Note 2 – Summary of Significant Accounting Policies (continued)

This pronouncement is effective for reporting periods beginning after December 15, 2021, using a modified retrospective adoption method for all leases existing at, or entered into after, the date of initial application. The Company elected to early adopt ASU 2016-02 at inception in September 2020 and utilized all of the available practical expedients. The adoption had a material impact on the Company's balance sheet but did not have a material impact on the statement of operations. The most significant impact was the recognition of ROU assets and lease liabilities for operating leases.

The Company determines if an agreement is a lease at inception. Leases with an initial term of 12 months or less are not recorded on the balance sheet and are expensed as incurred. Operating lease ROU assets and liabilities are recognized on the balance sheet at the commencement date, which is the date the Company obtains possession of the leased premises or equipment. The lease liability is determined based on the present value of the minimum rental payments using the discount rate in effect on the commencement date. The ROU asset is calculated based on the lease liability less any incentives received or prepayments made to the landlord. Rent expense is recognized on a straight-line basis over the lease term, which is generally the initial lease term exclusive of the option to extend the lease as the Company is not reasonably certain if it will extend at the time of lease commencement. Certain leases also include options to purchase the leased property. The lease term is used for the amortization/depreciation life of lease assets unless there is a transfer of title or purchase option reasonably certain of exercise, in which case the asset life is used.

Subsequent events – Subsequent events are events or transactions that occur after the balance sheet date but before the financial statements are issued or are available to be issued. The Company recognized in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing the financial statements. The Company's financial statements do not recognize subsequent events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after the balance sheet date and before the financial statements are issued or are available to be issued.

The Company has evaluated subsequent events through June 15, 2022, except for Note 8 that is through August 16, 2022, which is the date the restated financial statements were available to be issued.

Note 3 – Property and Equipment

Property and equipment consist of the following at December 31, 2021:

Machinery and equipment	$ 14,184,629
Leasehold improvements	8,288,287
Computers and software	122,069
Furniture and fixtures	25,071
	22,620,056
Less: accumulated depreciation and amortization	(1,027,246)
Construction in progress	922,296
Property and equipment, net	$ 22,515,106

Depreciation and amortization for the year ended December 31, 2021, was $1,022,620.

Note 4 – Leases

The Company has four non-cancellable operating-type leases for certain manufacturing, warehouse, and office space expiring through June 2029. The Company also has five non-cancellable finance-type leases for certain manufacturing and warehouse equipment expiring through May 2028.

The Company's operating leases generally contain rent escalation clauses that are fixed at lease inception, which are included in determining the lease liability and ROU asset. Certain leases generally require various expenses incidental to the use of the property, such as common area maintenance, property taxes, and insurance. These costs are separate from the base rent payment and are not considered in the determination of the lease liability and ROU asset. The Company has not noted any material instances in its leases where these costs were included in the base rent payment and has elected the policy to not separate lease from non-lease components when they are combined with the base rent payment.

Note 4 – Leases (continued)

Components of the Company's lease expense for the year ended December 31, 2021, are as follows:

Finance lease expense	
Amortization of right-of-use assets	$ 441,709
Interest on lease liabilities	604,740
Operating lease expense	4,854,722
Total	$ 5,901,171
Other information	
Cash paid for amounts included in the measurement of lease liabilities	
Operating cash flows from operating leases	$ 1,333,028
Operating cash flows from finance leases	$ 94,497
Financing cash flows from finance leases	$ 814,093
Lease assets obtained in exchange for lease liabilities	
Operating leases	$ 34,074,913
Finance leases	$ 11,423,314
Weighted-average remaining lease term (in years)	
Finance leases	2.93
Operating leases	7.14
Weighted-average discount rate	
Finance leases	3.22%
Operating leases	1.44%

Future lease payments consist of the following:

	Finance	Operating
Years Ending December 31,		
2022	$ 3,048,163	$ 6,112,012
2023	3,101,926	6,458,748
2024	4,388,763	6,630,658
2025	265,555	6,829,577
2026	230,597	7,034,465
Thereafter	161,289	16,059,990
Total	11,196,293	49,125,450
Less: imputed interest	(587,072)	(2,801,338)
Present value of lease obligations	10,609,221	46,324,112
Current portion of lease liabilities	(2,777,608)	(5,474,698)
Lease liabilities, net of current portion	$ 7,831,613	$ 40,849,414

Note 5 – Related-Party Notes Payable

At January 1, 2021, the Company had a $5,000,000 unsecured promissory note payable to a member. The note bore interest at 1% and outstanding principal plus accrued interest of $14,444 was repaid on January 2021. In June 2021, the Company issued another $5,000,000 unsecured promissory note payable to the same member. The note bears interest at 15% and matures in June 2022. In November 2021, the Company issued an additional $2,500,000 unsecured promissory note payable to the same member. The note bears interest at 10% and matures in November 2022. The outstanding principal balance on both notes is due in one lump-sum payment at the maturity date together with accrued and unpaid interest. The outstanding balance of the notes at December 31, 2021, is $7,500,000. Interest expense on the notes was $571,010 for the year ended December 31, 2021.

Note 6 – Members' Equity

The Company has the following classes of membership and outstanding units as of December 31, 2021:

Preferred Units – 2,114,724 Preferred Units authorized, issued, and outstanding.

In connection with the $7,500,000 in unsecured promissory notes payable outstanding as of December 31, 2021 (Note 5), the Company has granted a member an option to purchase 28,500 preferred units at a set exercise price at any time before the ten-year anniversary of the respective promissory note effective date.

Common Units – 500,000 Common Units authorized and issued.

DrinkPAK Holdings, LLC, a related party formed by the two founders of DrinkPAK, LLC, committed to investing a total of $600,000 in exchange for these 500,000 Common Units. Capital contributions of $250,000 were received during the year ended December 31, 2021. The remaining $350,000 vests in the form of compensation expense in lieu of a cash contribution, which is fully vested in September of 2022. The Common Units are subject to forfeiture should the founders cease to provide continuous services on or before the founder fully-vesting date.

Liquidation – Upon the liquidation of the Company, the Company shall first pay or make provision for the payment of all of the liabilities of the LLC, including the establishment of reserves as the management committee may deem necessary or appropriate for any anticipated obligations or contingencies of the Company arising out of or in connection with the operation or business of the Company. All remaining assets are distributed to the members.

Note 6 – Members' Equity (continued)

Profit Interest Units – The Company has adopted an equity incentive plan to provide for the issuance of Profit Interest Units ("Units") to employees, managers, and third parties in such amounts as determined by the Company. The membership interests being granted with these Units do not receive profit or loss distributions from the Company until the Units are vested. During the period since inception to December 31, 2020, 13,073 Units were granted and during the year ended December 31, 2021, the Company granted an additional 94,146 Units and had a total of 107,219 Units outstanding as of December 31, 2021. A total of 3,541 Units were vested as of December 31, 2021. The stock-based compensation expense for these vested units was immaterial.

Additionally, the Company has an agreement with DrinkPAK Holdings, LLC that provides for 125,000 Units granted on January 14, 2021, that are performance-based ("Performance Units"). No Performance Units have vested as of December 31, 2021.

Note 7 – Commitments and Contingencies

From time to time, the Company is involved in various routine legal proceedings incidental to the conduct of its business. Management does not believe that any of these legal proceedings will have a material adverse impact on the business, financial condition, or results of operations of the Company.

Note 8 – Restatement

Subsequent to the original audit report date of June 15, 2022, errors in the number of common units issued was identified and corrected. The impact of these errors resulted in the overstatement of net loss, prepaid expenses and other current assets, as well as members' equity for the year ended December 31, 2021. Amounts adjusted are reflected within the table below.

Note 8 – Restatement (continued)

	As Issued	Adjustment	As Restated
Balance Sheet			
Prepaid expenses and other current assets	$ 1,498,920	$ (100,000)	$ 1,398,920
Total current assets	6,825,165	(100,001)	6,725,164
Total assets	87,227,974	(99,999)	87,127,975
Members' equity	10,893,268	(99,999)	10,793,269
Total liabilities and members' equity	87,227,974	(99,999)	87,127,975
Statement of Operations			
General and administrative expenses	3,779,125	(1,250,005)	2,529,120
Total operating expenses	6,881,303	(1,250,006)	5,631,297
Loss from operations	(11,041,936)	1,250,002	(9,791,934)
Net loss	(12,217,686)	1,250,002	(10,967,684)
Statement of Members' Equity			
Issuance of common units	350,000	(100,000)	250,000
Non-cash issuance of common units	1,250,000	(1,250,000)	-
Net loss	(12,217,686)	1,250,002	(10,967,684)
Balance, December 31, 2021	10,893,268	(99,999)	10,793,269
